HYPERGLOSS FINISH

QUICK TURNAROUND

Paint Protection Film Has Evolved

Developed over 4 years, P1 ChipGuard is the next generation of sprayable, peelable, paint protection that is designed to overcome the limitations of pre-cut adhesive film from a roll;

- **P1** protects from stone chips, road rash, scratches and key carrying vandals!!!
- **P1** is sprayed not laid, so covers intricate and tight radius curves without creasing
- **P1** has no limits on the size of the area covered
- **P1** uses no adhesive so is easily removed, without heat or damaging the paint underneath
- **P1** does not need cutting on your car, so there is NEVER a risk of damage or rust
- **P1** covers the whole panel. You will never see an edge
- **P1** will not lift or peel. Car wash and jet wash safe
- **P1** will not fade or yellow
- **P1** protects your paintwork against damage from UV rays, bird lime and tree sap

From the moment you drive your new pride and joy off the forecourt, the paintwork is vulnerable to all that the road can throw at you. **P1 ChipGuard** was designed to give you peace of mind that everyday road debris will just bounce off, protecting your investment and keeping your car as good as new.

When professionally applied in a purpose built spraybooth, **P1 ChipGuard** can protect any part of your vehicle, from just the front bumper to the complete car.

If you love your car, you'll love P1 ChipGuard, find out more at
